

NOTICE

Execution Authoring Preview

PROPRIETARY TECHNOLOGY · EVALUATION PREVIEW

Celluster is proprietary technology. This package contains the Celluster Execution Authoring Preview and associated Celluster materials. It is distributed solely for evaluation under the accompanying **RELEASE/EVALUATION-TERMS.pdf**.

The Cell execution model, execution-native semantic computing architecture, Reflex-native execution mechanisms, authored execution contracts, Cell Life Surface presentation, and associated implementation remain the property of Celluster, Inc. No ownership interest is transferred by access to, download of, possession of, or evaluation of this package.

PATENT STATUS

Celluster has patent claims that have been allowed. Celluster may also have additional patent applications, continuations, filings, or other patent rights at various stages. This notice does not identify particular claims with particular product concepts and does not expand or limit the scope of any patent right.

EVALUATION BOUNDARY

This package is intended to let an evaluator understand and assess Celluster's execution-authoring model and the Release-1 experience. Evaluation access does not itself grant rights to commercialize, redistribute, repackage, create derivative products from, appropriate, or represent Celluster technology or intellectual property as the evaluator's own.

Any rights to copy, use, inspect, or otherwise handle the package are only those expressly provided by the accompanying Evaluation Terms and applicable law.

PACKAGE MATERIALS

The notice applies to the Celluster release binary, authored .cell contract, Cell Life HTML and video, Companion, and other proprietary Celluster materials included in this distribution. Third-party software or components, if any, remain subject to their respective notices and license terms.

NOTICES & ATTRIBUTION

Do not remove or obscure Celluster ownership, copyright, proprietary, patent-status, or other notices included with the package except as permitted by the Evaluation Terms or applicable law.
